

SYMBIOSIS INSTITUTE OF TECHNOLOGY, NAGPUR

Symbiosis International (Deemed University)

(Established under section 3 of the UGC Act, 1956)

Re-accredited by NAAC with 'A++' Grade | Awarded Category – I by UGC

Founder: Prof. Dr. S. B. Mujumdar, M. Sc., Ph. D. (Awarded Padma Bhushan and Padma Shri by President of India)

Practical 2

AIM:- Use var, let, const, and demonstrate basic features like template literals and destructuring; build a billing calculator with user input.

```
// Use var, let, const, and demonstrate basic features like template literals and destructuring; build a billing calculator with user input.

// Billing Calculator
// Billing Receipt
// Customer: Sanvi Wadhankar
// product: Leave-In Conditioner
// Quantity: 5
// Price per Item: ₹550
// GST (18%): ₹495.00
// Final Bill: ₹3245.00

// Sanvi Wadhankar 24070521191
```

Theory:-

- **var:** The original way to declare variables. It is **function-scoped** (meaning it's accessible throughout the whole function) and can be re-declared
- **let:** Introduced in ES6, this is **block-scoped** (only accessible within the {} block it is defined in). You can update it, but you cannot re-declare it within the same scope
- **const:** Also ES6 and **block-scoped**. It creates a read-only, **immutable reference**. It cannot be re-declared or reassigned, and must be initialized at the time of creation
- **Template Literals:** Instead of using cumbersome plus signs (+) to combine strings and variables, you use backticks `
- **Destructuring:** An ES6 expression that allows you to extract data directly from arrays or objects and assign them to distinct variables in a clean, readable syntax.

Conclusion:-

Hence we have created a website using var, let, constant and template literals in html and JavaScript
