Symbiosis International (Deemed University)

(Established under section 3 of the UGC Act, 1956)

Re-accredited by NAAC with 'A++' Grade | Awarded Category – I by UGC

Founder: Prof. Dr. S. B. Mujumdar, M. Sc., Ph. D. (Awarded Padma Bhushan and Padma Shri by President of India)

Practical 5

AIM:- Apply array methods and object handling; create a cart total calculator with discount logic

Theory:-

- **Array syntax:-** `let numbers = [10,20,30];` stores multiple values in a single variable. represented using single brackets[].

- **Object:-** stores values in key-value pairs represented by curly braces{}

object syntax:- `let product = {name: "Book", price: 300 , quantity: 2}`

- **Array of objects:-** list of multiple objects / collection of multiple objects stored in array

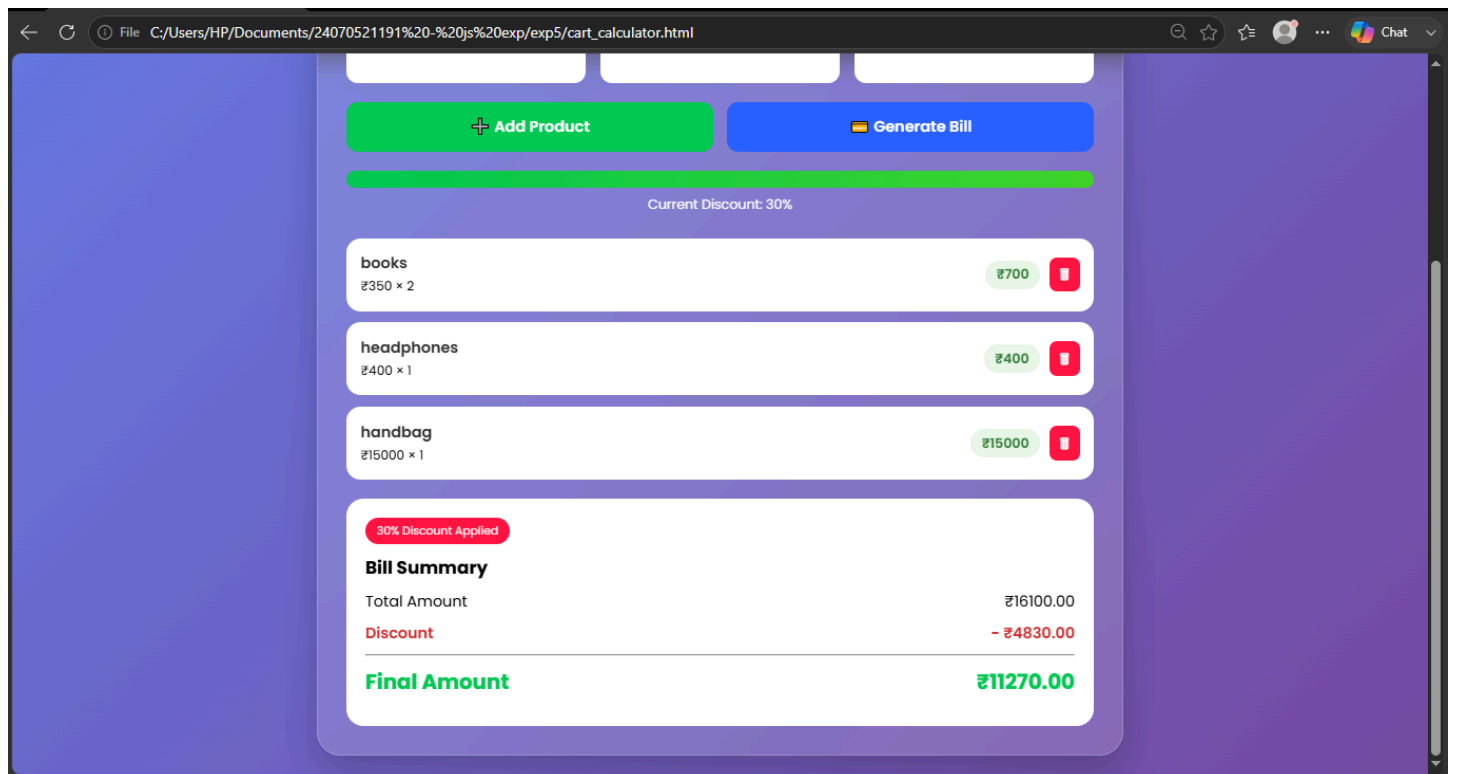

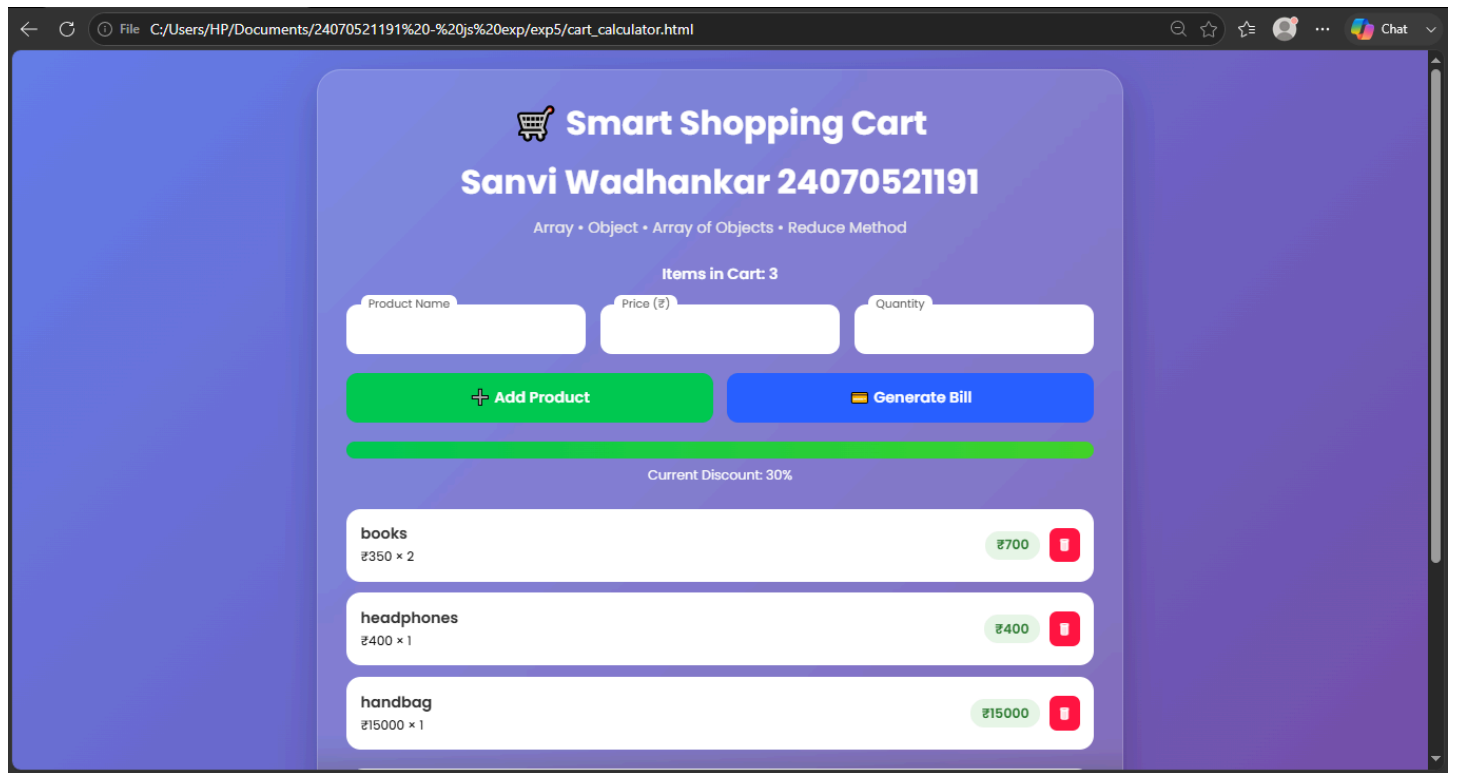

syntax:- `let cart =[`

`{name: "Book", price: 300, wuantity:2},`

`{name:"pen", price: 20, quantity:5 }`

`];`

- **Reduce method:-** used to combine all array elements into a single value , commonly used to calculate sum , total.average etc..

Conclusion:-

Hence we have created a smart cart that totals the cart items and provides the discount amount accordingly
